

AMALA INSTITUTE OF MEDICAL SCIENCES, THRISSUR
Teacher's Report on Student Performance in Laboratory/Clinical Posting

Introduction:

This report summarizes the performance, attitude, and clinical/laboratory skills demonstrated by MBBS students during their assigned laboratory or clinical postings.

General Observations:

- Students were punctual and regular in attending clinical/laboratory sessions.
- Most students displayed a positive attitude toward patient care/laboratory work.
- Clinical reasoning and practical skills improved progressively with guided supervision.
- A few students required additional support in history taking, case presentation, or procedural skills.

Strengths Noted:

- Good patient communication skills.
- Willingness to learn and active participation.
- Accurate execution of lab/clinical procedures under guidance.

Areas for Improvement:

- Documentation and presentation skills.
- Time management during practical tasks.
- Independent clinical decision-making.

Recommendations:

1. Assigning mentors for students needing additional help.
2. Continued reinforcement of core clinical/lab competencies.
3. Encouraging reflective learning and self-assessment.
4. Conducting periodic evaluations with feedback sessions.

Conclusion:

The clinical/laboratory exposure has positively contributed to students' practical knowledge and professional behavior. With ongoing support and supervision, students are expected to develop into competent and compassionate healthcare professionals.
