How would you rate the support you received from non academic staff ?

56 responses

Did you feel that your institution provided enough support for your personal and emotional well being ?

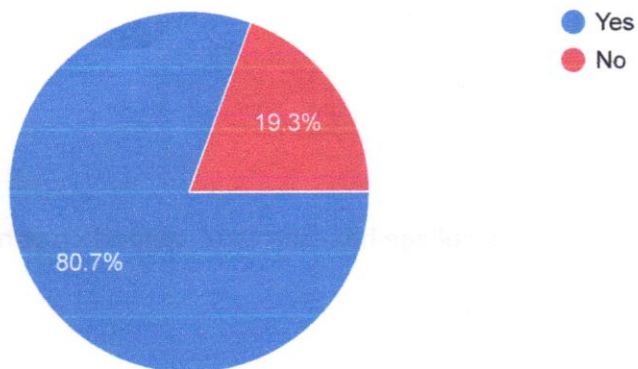

57 responses

Are you satisfied with the career support provided by your institution ?

57 responses

What aspects of the college did you find most helpful during your time here?

30 responses

Support from my classmates, postgraduates , faculties, nurses and non teaching staff

Clinical case discussions

Atmosphere

The garden spaces. Library. The faculties. The college has started to support co curricular activities.

Academics

Connectivity. 24 hours water and electricity.

Clinics

All the faculties were very helpful and the college provides a very good atmosphere to study

There is a good bunch of teachers,rest needs a lot of improvement

Academic section was good but during internship it didn't actually help and our clinical knowledge is limited as compared to government medical college.

Support from faculty members and library and research opportunities

Library ,some amazing staff ,some clinical postings were a good learning experience

House surgeoncy

Academic brilliance

Cultural events, internship, batchmates

Good teacher support system and Spiritual base

Spirituality,Environment

Excellent faculties, opportunities to learn and grow as an individual and clinician

chackochandni@gmail.com

Environment, nature friendly campus , supporting faculties

Holistic approach to patients. To be rich in moral aspects. Faculty support for our academics os really good.

Chapel

Beautiful atmosphere

Some faculties(doctors) were good.

The safe and well maintained campus and facilities. Clean environment. Teaching and learning oriented especially in first year. Clinics helped in better understanding of the subject than theory classes. Supportive seniors PGs faculties and non-teaching staff helped in career growth. Overall a very pleasant and comfortable experience, did not have any external stress factors during exams or internship duty.

Faculties and management being approachable

Support

Almost everything

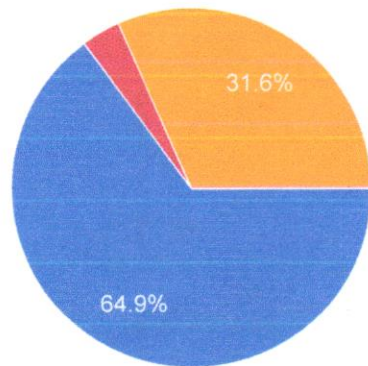

Friends, cultural events, post graduates,

Support from senior faculties

Would you recommend this college to others?

Even though the academic aspect of the college is at a good level, we do not get much opportunity for developing our skills. Even during internship our job is basically clerical work. The college also falls short of providing ample non academic programmes and also restricts us in many ways

The hostel is still very strict, with regards to the curfew. The curfew should not be there anymore. The cafeteria staffs are very slow. The food delivery people should be allowed till the hostels. The recreation room above the gym is still a mess. The library should be accessible 24 hours. There should be rooms for HS and PGs near the ED to rest during duty nights.

Mbbs training involve equal importance to surgical skills and medical knowledge. Regarding surgical training, my ug college(amala) is big zero. (lighter terms - zero. Actually need another word starting with F)

All round development of an individual is not important, mostly or sometimes only academic part is focused. And another issue is there's so much obstacles to do something entertaining in the college, i wish for it to be a little relaxed on such aspects as fun and entertainment is important in field where high stress will be there. And pls bring better food to the canteens at similar rate. otherwise the place is fine, it's booming with developments and new infrastructure.

chackochandni@gmail.com

College needs to give more opportunities to interns, rather than filling up forms and doing office work. They should prepare us to be independent working doctors
