- Very Dissatisfied

Which areas of the curriculum need more emphasis or improvement?

72 responses

Research

Hands on training

All Areas Have Been Well Thought Of Nothing To Add To That

Recent advances

More interesting college event participating

Hospital laboratory postings for interns and mbbs students

..

Interesting lecture classes

Research Support

Skills lab

Clinical training

More patient load

Not much, proud to be an amalite

Classes

Medical writing skills

Overall is satisfactory

Public health and patient counselling

More hands on training in all departments. Introduction of manequin based in training in departments with less patient load.

We have the best training when compared to others

More training for handling professional and ethical issues, to encourage researches more.

Skill labs

Research areas

Hands on training , Orientation to biomedical research,Integrating multidisciplinary approach

Proactive

Physical medicine and rehabilitation

The transition from Plus Two to the first year of MBBS is a very challenging time for an average student. During this period, first-year faculty have a responsibility to motivate and support students. Unfortunately, instead of offering encouragement, some faculty members often compare and humiliate students publicly, which can be deeply discouraging.

Hostel facilities needs to be improved

Clinical training, mentoring

Practical skills

AI in healthcare

Research opportunities

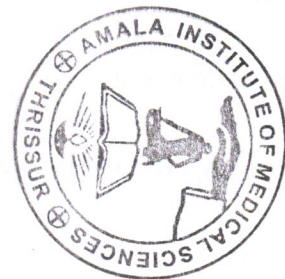

Clinical aspects

Clinical teaching

Medical entrepreneurship

When I was there the details of class was not circulated properly or the lecture hall numbers .Hence couldn't attend many theory class. If there is a designated class for each batch of students this problem will be solved.

Extra curricular activities

Foundation course and awareness about the training and importance

Upcoming research and changes

Things have changed - focus to be on clinical medicine and its practical application

Practical

Students should get exposed to clinics in periphery for betterment of patient management later in their life

Research activities

Research orientation should improve more

Providing More hands on training for Interns during Clinical postings

Clinical practice or being a GP

Making the students understand why they are learning the subjects

The curriculum with which we were taught is ok

Clinical skills and hands on training.

Surgical training is below par. Even basic life saving skills like icd insertion, endotracheal intubation or even putting peripheral lines are not trained here.

Studied 20 yrs ago and curriculum has changed already

Clinical practice

More research

Research

Clinical postings

NA

First year. For me i didn't know how to study, which materials and resources will be helpful. No teachers in the first year never asked why did you get less marks. First year teachers were horrible except biochemistry department. They were good teachers especially ajith sir and hod sir i forgot his name. Second year onwards all were good both in the clinical and non clinical.

More training to handle ethical and professional issues

Innovative Teaching learning methods

Cocurricular activities

Academics and research work

Research and publications

It was perfect for us

Certain departments were too toxic. Wish that was the other way around

Need to add BLS, ACLS as part of curriculum

clinical and practical approach

Integrated learning and practical aspects of general practice

Mentorship

What do you consider to be the key strengths of the medical training program at our college?

72 responses

Faculty

Faculties

Academics

Teachers

Practical and Hands On Training

Efficient Clinical Teachers

Good staff good patient load

Clinical postings and bedside case discussion

Good faculties and classes

clinics

Teachers

Clinical postings

Excellent Faculty

Experienced staff

Best faculty, patient load, best resources

Good faculty support

Experienced and academically oriented faculty

Good exposure and hands on

Faculties and infrastructure

Academics and good teachers who are committed.

Efficient and experienced faculty

The stress on academics was good

Research areas, poster presentations, article reading and analysis, journal analysis; statistical methods helpful for future article analysis and presentations, authentic grievance cell support team

Infrastructure , Faculty with good experience, visionary Administration

Strong Clinical Exposure

Infrastructure and supportive faculties and seniors with zero ragging

Good faculties and good management

Medicine department

Patient load

Good professors

Faculty

Teachers. They were very knowledgeable , very wonderful, good mentors ,good supportive persons.

Knowledge of our teachers & infrastructure of the institute

Faculty clinics classroom session

Clinical

We were and are always a family

Good infrastructure good teaching faculty

Concepts are made clear

The best faculty ever seen

Good faculties

Discipline, strict adherence to protocols

Excellent & Dedicated Faculties, State of the art library facilities, Research opportunity

All facilities are available

Clinics

The teachers who did it

Infrastructure, Responsible and loving teachers, character building.

General medicine department was good during my time.courtesy of Dr. T.P Antony

Faculty and peaceful campus

Academics and faculties

Discipline

Highly skilled professors

Good teachers

Good mentorship, all faculties were amapproachable

Experienced Faculty

Internship

Hands on training received

Experienced faculties like tp sir

The Teachers
