Agenda and Discussion Points

Agenda - For emergency clearance of one Faculty research project

IRC NO	Title of Research Article	Name of Principle Investigator	Decision of IRC (Approved/Modification/Rejected)
66/24	Clinical Biochemistry Laboratory reporting of scattered light spectroscopy of cells using Abbott Alinity H	Dr. Jose Jacob Professor & Head Dept. Biochemistry Faculty Project	Conditional Approval

Decision of Research Committee

This is with reference to your resubmission to (IRC No 66/24) your project titled " Scattered light Spectroscopy Data generation, Analysis and Reporting of Haematological cell characteristics using Abbott Alinity H". The research committee feels that scientifically spectroscopy cannot be offered for patient care without proper comparison against gold standard like peripheral smear. Otherwise it has to be just a descriptive study collating the data observed on spectroscopic analysis which it is not. As we have reservations regarding the methodology we suggest you take an expert opinion from the institute's facilitation department and then approach IEC. We will forward your proposal with IRC's Conditional approval(Methodology need to be sorted out) with suggestions to IEC at the earliest as this project report came with the letter from the management seeking expedited review for reasons that could affect the reputation of Amala institute of Medical Sciences, if the project is delayed.

Procedure & Decisions

Conditional Approval – To modify the methodology part with the help of Institutional research Promotion cell. Only then it can be submitted to Ethical Committee..
