

ONEAMALA

One Amala is a recently updated internal website designed to enhance communication and coordination within our organization. It includes features for managing events, sharing circulars, handling patient shifts, and accessing various hospital-related applications, all aimed at improving efficiency and keeping staff well-informed.

The screenshot shows the ONEAMALA website interface. At the top, there is a navigation bar with links for HOSPITAL, MEDICAL COLLEGE, NURSING COLLEGE, LOGIN, PARAMEDICAL, and NABH. Below this is a banner for Amala Medical College Hospital, NABH Accredited, featuring the NABH logo and the Amala logo. A quote by Nelson Mandela is displayed: "EDUCATION IS THE MOST POWERFUL WEAPON YOU CAN USE TO CHANGE THE WORLD." - NELSON MANDELA. The main content area includes a photo of a group of people in white coats, a list of links (Phone Directory, Patient Shift, Apps, Intranet Mail, Doctor leave Information, Class Schedules, Ongoing Surgery, DOS- Microbiology & Serology, OCS- Hematology and Clinical Pathology), a Circulars section with three entries (GLUCOMETER CALIBRATION, CIRCLAR, 18-06-2024; CIRCLAR, 06-06-2024; CIRCLAR, 16-04-2024), and a Welcoming Our Newly Joined Doctor section with a photo of a woman and a Windows logo.

CLASS SCHEDULE

The screenshot shows the AmalaIMS website interface. The top navigation bar includes links for Home, About Us, Published Schedules, and Login. The main content area is divided into two sections: Published Schedules and Login. The Published Schedules section is currently empty. The Login section has fields for Username and Password. Two circular logos are visible in the bottom right corner: the Amala Medical College Hospital logo and the Amala Institute of Medical Sciences logo, Thirissur-680 555.

The Class Schedule application is used to organize and schedule classes for MBBS students. It helps in planning and managing the timetable, ensuring that students and instructors have a clear and structured schedule for their courses and lectures.

In class schedules, subject-wise scheduling allows you to organize and manage academic sessions effectively. To begin, select the relevant department from the provided list to focus on a specific subject area. Next, choose the desired date for which you want to schedule the classes. This ensures that all sessions are aligned with the academic calendar and department requirements. Once the scheduling is complete, you have the option to export the list of scheduled classes in either PDF or Excel format.

MOODLE

Moodle is an online learning platform used in medical colleges, to facilitate various academic activities. its use for MBBS students and Continuing Medical Education (CME) for doctors. Moodle provides a virtual classroom environment where lectures can be delivered live or through pre-recorded videos. Students can access learning materials, participate in discussions, and collaborate on projects. Moodle has built-in attendance tracking features that allowed educators to mark and monitor student attendance in online classes. This can be done manually or through automated tools that track participation.

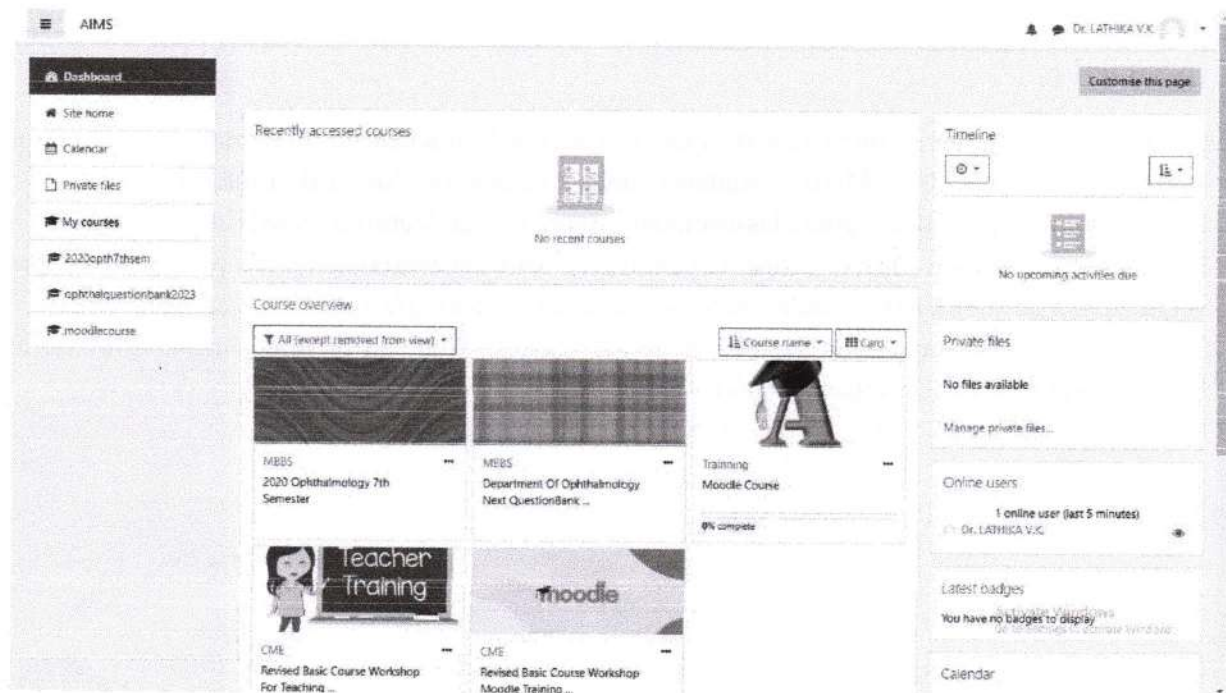

The screenshot shows the Moodle login interface. At the top center is the logo of Amrita Institute of Medical Sciences. Below it are two input fields: 'Username' and 'Password'. To the right of the 'Username' field is a link: 'Forgotten your username or password?'. Below the 'Password' field is a checkbox labeled 'Remember username'. To the right of the password field are two lines of text: 'Cookies must be enabled in your browser' with a small icon, and 'Some courses may allow guest access'. At the bottom of the form are two buttons: 'Log in' and 'Log in as a guest'.

PATIENTSHIFT&PORTABLEX-RAY

Patient Shift refers to the process of moving a patient from one location to another within a healthcare facility. This could involve transferring a patient from one room to another, from the emergency department to a ward, or from one hospital department to another.

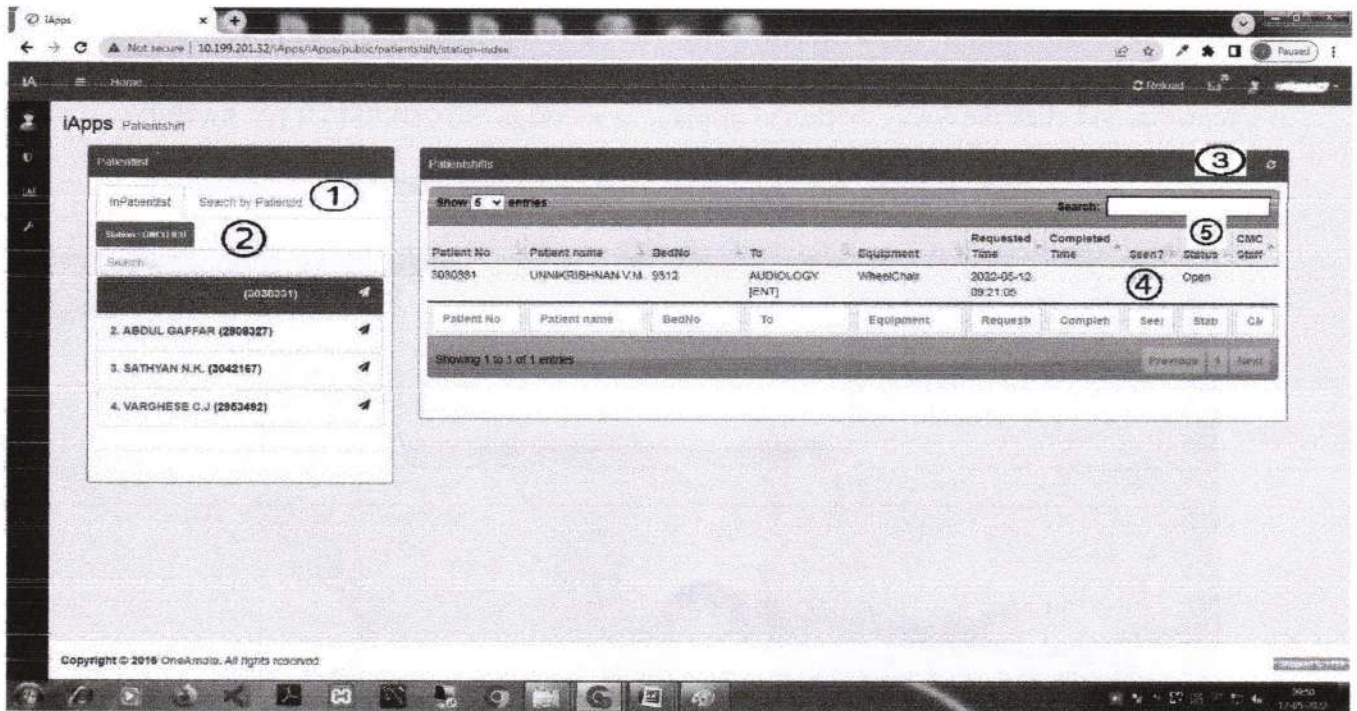

Portable X-ray refers to a mobile radiography system that allows X-rays to be taken at the patient's bedside. This is especially useful for patients who are bedridden or unable to be transported easily to a radiology department

The steps for patient shift and portable X-ray are as follows;

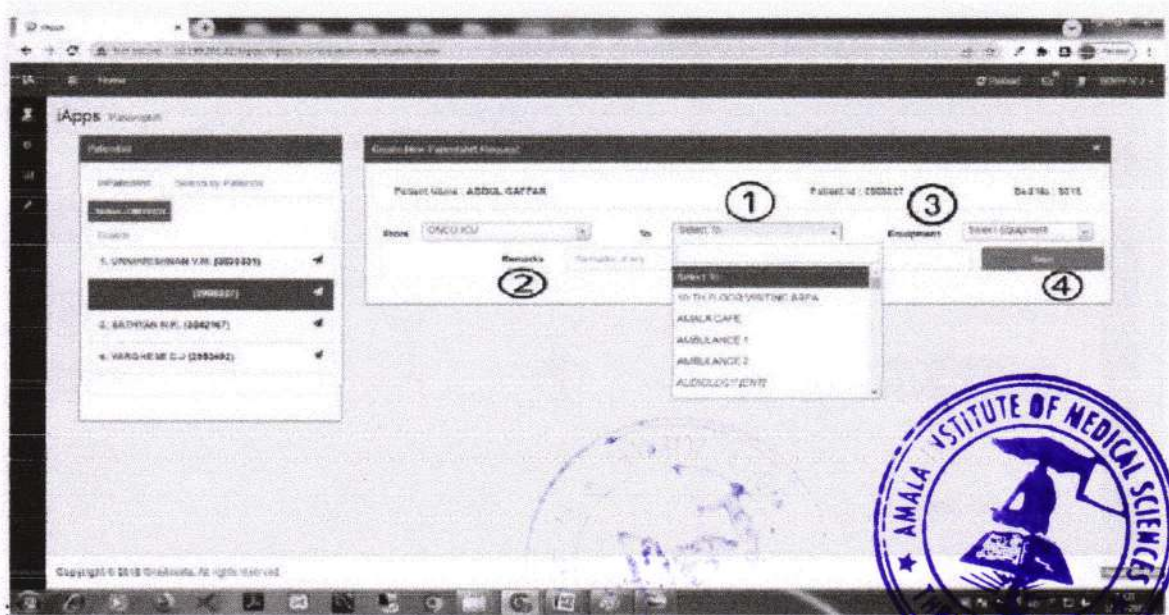

The main steps are included

- Homepage
- Create request
- Cancel request

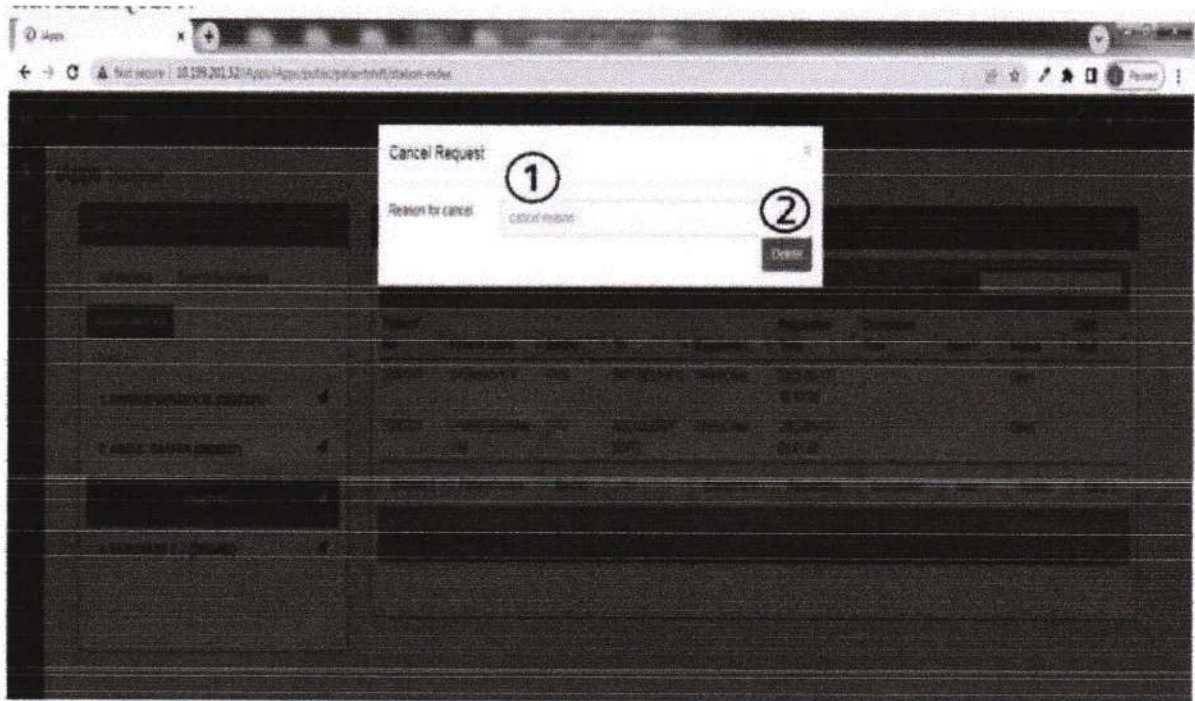

You can search for any patient by their patient ID, even if they are not in the inpatient list. Simply search for the patient's ID or name from the list below. If needed, use the refresh icon to reload the table. The table will display the seen status and the current status of the request.

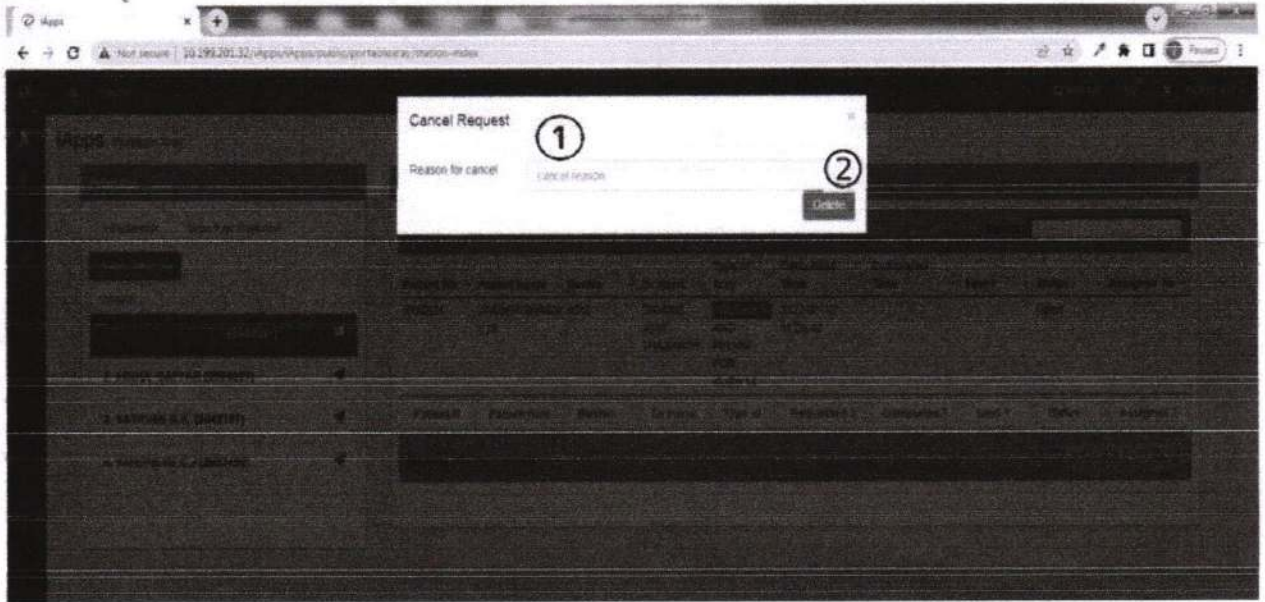

Create request, Select the destination station name under "To," choose the equipment, enter any remarks, and click the SAVE button to display the message 'SUCCESSFULLY SAVED.'

Click on the row with 'open' status that you want to delete, enter the reason for cancellation, and then click the 'Delete' button to remove the request.

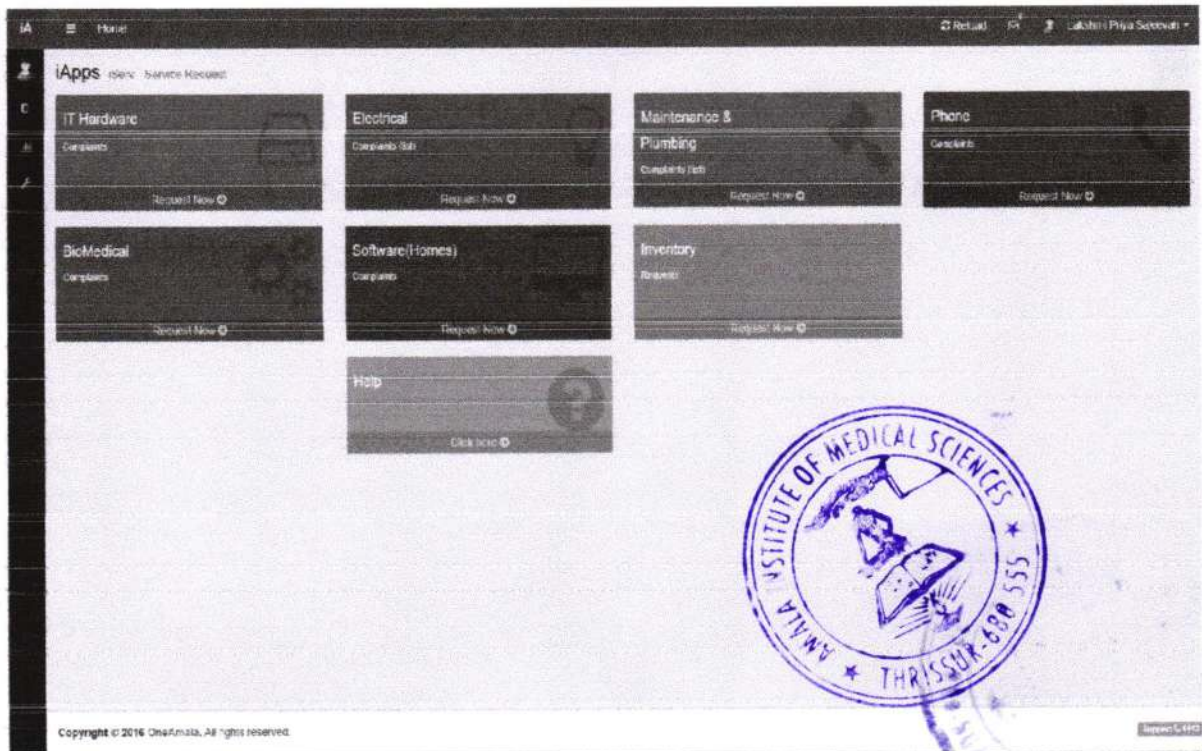

Portable Xray, Homepage and Create Request

Cancel Request

iApps Application– iServ (Service Request)

The iApps application provides an "Option Service Request" feature, which is used to request or register complaints. This feature allows users to select the relevant department, fill in the required fields, and submit the request. The main purpose of this service is to facilitate the registration of complaints, ensuring that they are directed to the appropriate department for resolution.

The screenshot shows a web application interface for submitting a service request. At the top, there is a navigation bar with 'Home' and a user profile 'Lakshmi Priya Sajeevan'. Below this, the page title is 'iApps | Serv - Service Request'. The main form area contains several input fields and dropdown menus:

- Type:** A dropdown menu with 'IT Hardware' selected.
- Select:** A dropdown menu with 'Select' as the placeholder.
- + New:** A button to add a new item.
- Type:** A dropdown menu.
- Item Number:** A text input field with 'Item Number' as the placeholder.
- Problem *:** A text input field with 'Issue Title' as the placeholder.
- Problem Description *:** A text input field with 'Issue Description' as the placeholder.
- For(User):** A dropdown menu with 'Lakshmi Priya Sajeevan' selected.
- Location:** A dropdown menu with 'St.Mary's Block(Software De...' selected.
- Contact Person:** A dropdown menu with 'Lakshmi Priya Sajeevan' selected.
- Contact Number *:** A text input field with 'Ext'n Number / Mobile code' as the placeholder.
- Priority:** A dropdown menu with 'Medium' selected.
- Emergency Reason:** A text input field with 'Emergency Reason' as the placeholder.
- Remarks:** A text input field with 'If any' as the placeholder.

A 'Request' button is located at the bottom right of the form. At the bottom of the page, there is a copyright notice: 'Copyright © 2016 OneAmala. All rights reserved.' and a small logo on the right.

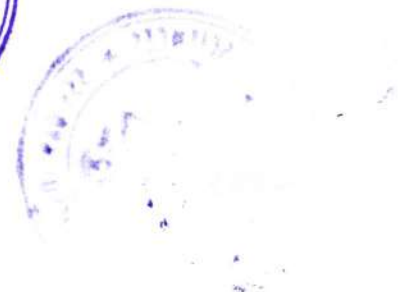

Incident Reporting System

The screenshot shows a web application interface for an 'Event Reporting System'. The interface is contained within a browser window titled 'iApps'. The form includes the following fields:

- Event Location:** A dropdown menu with the text 'SELECT EVENT LOCATION'.
- Event Date:** A date selection field.
- Reporting Category:** A dropdown menu with the text 'Select Category'.
- Event By:** A text input field.
- Affected People:** A dropdown menu with the text 'None' and a corresponding text input field.
- Details of event:** A large text area with the placeholder text 'Enter Details of the event'.
- Immediate Action Taken:** A text area with the placeholder text 'Enter Action taken on the event'.
- Immediately Notified To:** A text input field.

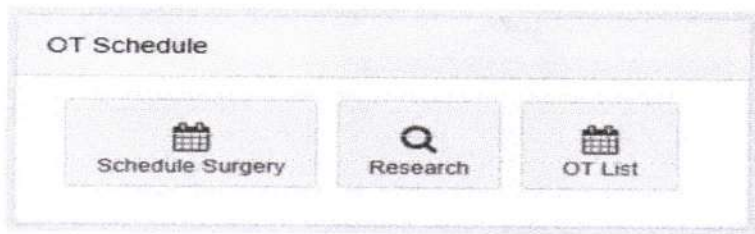

A 'Submit' button is located at the bottom of the form. At the bottom left of the browser window, there is a copyright notice: 'Copyright © 2016 OneAmisla. All rights reserved.' At the bottom right, there is a 'Support Us' link.

The Event Reporting System application is designed to report incidents to the quality department. Users can provide details such as the event location, names of affected individuals, incident location, date, and any immediate actions taken. This system ensures that all relevant information is captured to facilitate prompt and effective response and resolution by the quality department.

OT Schedule

The OT (Operating Theater) Scheduling application is designed to streamline the scheduling and management of surgeries. It offers a range of features to facilitate the efficient planning and execution of surgical procedures, ensuring smooth operations within the hospital. The OT Scheduling application is an essential tool for scheduling and managing surgeries. It allows for the ordering and confirmation of surgeries, ensures patient fitness assessments by anesthetists, and generates detailed reports and OT lists. These features collectively enhance the efficiency, safety, and quality of surgical operations within the hospital. Generates comprehensive reports that analyze the entire count of surgery data. These reports help in monitoring and improving the quality of surgical services. Automatically generates a list of scheduled surgeries, detailing the order and timing of procedures for efficient OT management.

The screenshot displays the 'Add New Schedule' form within the application. The interface includes a calendar for 'October 2023' and a detailed form for entering patient and surgery information.

Calendar: Shows dates from Sunday to Saturday. Some dates have small icons or text indicating scheduled events, such as 'Sa. coverage d', 'Sa. manipulat', 'Sa. ex. Fa. reph', 'Sa. PLATING', 'Sa. Microsurg', 'Sa. left pth', 'Sa. IIN', 'Sa. IIN TPA', and 'Sa. Microsurg'.

Add New Schedule Form:

- Surgery / Nora:** Select (dropdown menu)
- Doctor's Name:** SELECT (dropdown menu)
- Patient ID:** Enter PatID, Patient Name (text input)
- Age:** Age, Mobile, Enter MobileNo (text inputs)

SurgeryStatusReport

MDTB(MultiDisciplinaryTumorBoard)

A Multi-Disciplinary Tumor Board (MDTB) project is a collaborative effort within a healthcare facility to bring together specialists from different disciplines to review and discuss complex diseases cases. The primary goal of an MDTB is to ensure comprehensive and coordinated care for cancer or other patients by leveraging the expertise of various specialists. This collaborative approach helps in diagnosing, staging, and planning the treatment for cancer or other patients. The tumor board typically includes a range of specialists such as oncologists, surgeons, radiologists, pathologists, and other relevant healthcare professionals .Each member contributes their expertise to provide a holistic view of the patient's condition.

Event Registration

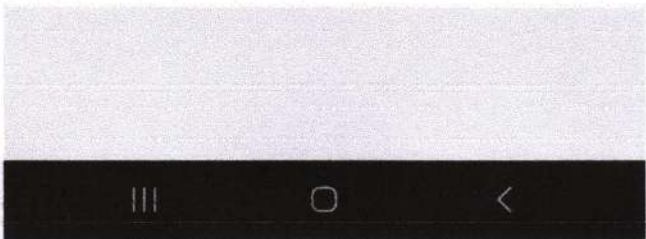

The event registering application is designed to streamline the process of organizing and approving events or meetings within an institution. Using this system, users can propose an event by selecting the event date, venue, and time, along with entering specific requirements such as IT support, electrical arrangements, and any other necessary facilities. They can also input the estimated budget for the event. Once the event is submitted, it goes through a multi-level approval process. First, the Head of Section (HOS) verifies the details and either approves or requests changes. After HOS approval, the request moves to the priest-in-charge, who reviews the nature and purpose of the event and either approves or rejects it based on its appropriateness. Finally, the director reviews the entire proposal and gives the final approval. Only after all these approvals is the event officially scheduled and confirmed. This application ensures a transparent, organized, and efficient workflow for event management within the organization.
